

## Purpose and Approach

🕒 2 min

- Download all visible files, folders, files of student folders and pages of a course as a ZIP-archive.
- Download the files with a clear folder structure.

**NOTE:** Files from assignments, quizzes or most activities will not be downloaded. The Download Center only provides files of the resource types "File", "Folder", "Page" and "Book" as well as files of the activity "Student Folder".

**1** Open Download Center

**2** Choose elements and create ZIP-archive

**4** Unpack ZIP-archive and check files and folders

**3** Download ZIP-archive

## Short description of the procedure

1. In the block "Navigation" click on "Download Center" to export all files, folders, books, pages and files of student folders of a course as a ZIP-file.  
Note: Only visible files, folders, books, pages and files of student folders of a course will be downloaded. Files from activities such as assignments, quizzes etc. will not be exported except the activity type "Student Folder".
2. The overview page shows all available files, folders, books, pages and files of student folders of a course listed in the topics. With the checkboxes it is possible to deselect the files one does not want to download. Afterwards click "Create ZIP-archive".
3. Confirm the download process from the used browser.
4. Unpack the ZIP-archive and open the files in a file management system. The files are arranged in a clear structure.
